LETTER OF TRANSMITTAL

Honorable John Y. Brown, Jr.
Governor of Kentucky
Frankfort, Kentucky

Sir:

I have the honor to submit for your approval the report of the Department of Mines and Minerals for the year ending December 31, 1981, this being the one hundred and second report of this Department.

Very respectfully yours,
Willard Stanley, Commissioner
Department of Mines and Minerals

Lexington, Kentucky

This copy has been prepared by the Department of Mines and Minerals and paid for from state funds.

INTRODUCTION

Kentucky coal production reached an all time high of 157,559,504 tons in 1981. The 1981 production of 157,559,504 tons was 7,415,531 tons higher than the previous record high year of 150,143,973 set in 1980. Kentucky remained the nation's largest coal producing state by out-distancing the nearest rival by 44,745,532 tons. In 1981 over seventy-seven million tons of coal were mined by surface operations while over seventy-nine million tons were mined underground.

The coal industry furnished direct employment for 59,398 miners.

Thirty-six miners were killed in Kentucky coal mine accidents in 1981.

The clay mining industry mined 389,468 tons in 1981. No fatal accidents occurred at clay mines during the year.

The following chart compares production of the various types of coal mines for the past two years:

DIRECTORY AND STATISTICS OF DEPARTMENT OF MINES AND MINERALS INSPECTION DISTRICTS

To facilitate the mine inspection duties of the Department, the coal fields have been divided into five inspection districts. A mine rescue station which serves as the district office is centrally located in each district. The Eastern Kentucky coal field is divided into four districts, with mine rescue stations located at Harlan, Hazard, Martin and Pikeville. An office at Madisonville serves the Western Kentucky coal field.

The operations for the district offices is directed from the office of the Commissioner located in Lexington. General staff and Lexington office personnel are as follows:

Willard Stanley, Commissioner
Margaret Caywood, Principal Assistant
Linda Harmon, Administrative Secretary
Myrna Kay Van Meter, Administrative Secretary[1]
Stephen Blevins, Assistant to the Commissioner[2]
C.C. Smith, Director of Administrative Services[3]
Ralph Coldiron, Director of Administrative Services[4]
Jon Wertzler, Director of Administrative Services[5]
Donald Campbell, General Counsel
Cecil Sherman, Chief Examiner, Eastern Kentucky
Douglas Monroe, Chief Examiner, Western Kentucky
Sandra Thor, Chief Clerk Typist[6]
Georgia Staab, Chief Clerk
Vicki Sanders, Administrative Supervisor
Barbara Crawley, Chief Clerk[7]
Susan Harrell, Sr. Account Clerk[8]
Ruth Stubblefield, Jr. Account Clerk
Le Thu Nguyen, Sr. Account Clerk[9]
Barbara S. Rose, Chief Clerk[10]
Voline Norris, Chief Clerk Typist[11]
Eula Witt, Chief Clerk Typist[12]
Delbert Robison, Printing Equipment Operator
David Price, Principal Clerk (Part-time)[13]
Rodney Barton, Messenger (Part-time)[14]
Mitchell Bryan, Principal Clerk (Part-time)[15]

The Directory and Statistics of Coal Mines contained in the following pages is separated by Inspection Districts and by Counties.

Code letters to classify mines are as follows:

UTC	Underground Truck Coal
URC	Underground Rail Coal
UWC	Underground Water Coal
STC	Strip Truck Coal
SRC	Strip Rail Coal
ATC	Auger Truck Coal
ARC	Auger Rail Coal
ASTC	Auger-Strip Truck Coal
ASRC	Auger-Strip Rail Coal
STCL	Strip-Truck Clay

Notations made are as follows:

a	abandoned
c	change of ownership
*	estimated tonnage
ta	temporarily abandoned
DNO	Did Not Operate

Production, employment, and accident figures for River mines have been included in the totals for Rail mines for the purpose of compiling these statistics.

Many of the coal production figures of individual mines which appear herein have been estimated by the Department. This was necessary because the reports of the operators of those mines, particularly mines which became abandoned during 1981, were delinquent at the time of publication.

TRAINING AND EDUCATION

A full time Training and Education program was established in 1971 with a Federal Grant from the U.S. Bureau of Mines, now known as the Mine, Safety, and Health Administration (M.S.H.A.). This is a very effective program and is staffed with ten well qualified mining instructors and five electrical instructors who are stationed in the five district and one sub-district offices and mine rescue stations.

Since March of 1972 this agency has acted as a process agent for the educational institutions in establishing Schools of Mining Technology. Presently the participating schools are Pikeville College, Morehead State University and Madisonville Community College. Also, the Kentucky Department of Education is participating in this grant by offering statewide classes for miners through their Vocational Schools.

The following list shows the type of certificates issued and the number of men/women involved in the different safety courses conducted by this Division in 1981. (This includes both organized classroom work and field work).

MINER TRAINING, EDUCATION AND CERTIFICATION DIVISION

The Board of Miner Training, Education and Certification as provided by Chapter 351, Paragraph 105, Kentucky Revised Statutes, was composed of the following members in 1981:

Willard Stanley	Chairman
William Joe Morgan	Mine Member—Eastern Kentucky
Bobby Ray Dukes	Mine Member—Western Kentucky[1]
Daniel Brown	Mine Member—Western Kentucky[2]
Andrew Adams	Operator Member—Eastern Kentucky
H. Tom Barton	Operator Member—Western Kentucky
William E. Clayton, Director, Miner Training, Education and Certification Division	Non-Voting Member

Pursuant to KRS 351.106 Underground Miner Training and Certification Regulations were implemented in October, 1977. During 1978 the required 48-hour inexperienced miner's program was prepared and the first classes were taught in May, 1978. Through December, 1981, 19,856 persons were issued Temporary Inexperienced Miner's Work Permits; of this number 7,192 were issued during 1981.

After the Underground Miner Training and Certification Regulations were implemented in October, 1977, the Board of Miner Training, Education and Certification established a date of November 1, 1978, as the date all persons employed in underground mines should meet this requirement. As of December 31, 1981, 36,214 persons have been issued underground miner certificates. of this total, 492 are female miners.

Uniform two-day examinations for Mine Foreman and Inspectors were scheduled by the Board to meet the demand whenever it arose. Examinations were held in the Department offices in Lexington and at various localities throughout the coal fields, whenever the number of applicants made it justifiable. Mr. Doug Monroe served as Chief Examiner in the West Kentucky District and Mr. Cecil Sherman served as Chief Examiner in the Eastern Kentucky District with Mrs. Margaret Caywood as Exam Clerk.

Examinations were multiple choice in character. Applicants were given written examinations on the subjects of Mine Law; First Aid; Ventilation; Apparatus and Electricity; Fires and Explosives; General Mining Practices and Gases. Each applicant was tested on his/her ability to detect methane with a flame safety lamp and use an anemometer in the calculation of the rate of air current flow. The miner was further required to prove his/her knowledge of safe mining practices in an interview with the Examiner and to indicate safe and practical method of ventilation on a typical mine map.

A list of those who successfully completed the required examination for foreman and inspectors is shown on the following pages:

[1]Term expired February 24, 1981

[2]Appointed to replace Mr. Dukes March 5, 1981.

RALPH PERRY, DIRECTOR
MINE SAFETY ANALYSIS DIVISION

MINE SAFETY ANALYSIS DIVISION

During the year of 1981, the Division of Mine Safety Analysis completed 654,772 safety contacts and observations.

The Division now has a staff of 47 people, consisting of Director, 4 District Supervisors, and 53 Analysts in the field. There are 2 Analysts in each district assigned exclusively to roof control, in an effort to reduce the number of fatalities from roof falls. This approach has had a significant affirmative impact.

The Division also provides teams in each district, trained in the use of self contained oxygen breathing apparatus, for use in mine rescue operations. They are available twenty-four hours a day, and within a one hour drive of any mine in their district. Analysts are also trained in First-Aid, Cardio-Pulmonary Resuscitation, Mine Ventilation, Roof Control, Management Techniques, Mining Methods, and Mining Law.

The goal of the Department of Mines and Minerals, and the Division of Mine Safety Analysis, is to use our knowledge and experience to reduce serious injuries and fatalities to the people in Kentucky coal mines.

DIRECTOR EXPLOSIVES AND BLASTING

EXPLOSIVES AND BLASTING SECTION

During 1981, 274 new general licenses were issued, and 3,924 general licenses were renewed. Thirty-two new limited licenses were issued, and 182 limited licenses were renewed. There were 444 general examinations and 34 limited examinations given. To obtain the limited or general blaster's license, the applicant must pass the prescribed examination and possess two years of experience in the explosive field. Fifteen courses were offered around the Commonwealth with 341 people in attendance.

The Division of Explosives and Blasting continued its program of inspection, enforcement, education, and licensing of blasters in 1981. A total of 306 new blasters were added to the rolls of those previously licensed in the Commonwealth. As of December 31, 1981, there were 4,412 individuals holding current and valid Kentucky blasters licenses. Approximately 58% of these people are employed as surface coal mine blasters. The other 42% are engaged in construction, quarrying, demolition, seismic exploration, or other explosives related activities.

During the calendar year of 1981, a total of 834 million pounds of industrial explosives and blasting agents were sold for consumption in Kentucky. This includes those used in coal mining and quarrying as well as construction and all other purposes. This amount equals 19.6% of the total explosives used in the entire United States.

The division conducted fifteen blasters training courses throughout the Commonwealth. These classes were attended by 341 people, licensed blasters as well as applicants for the blasters examination. These courses consist of thirty hours of instruction covering all aspects of explosives use. The overall purpose of these courses is to raise the competency level of the blasters in the field. The public is better protected, and the blaster's work environment becomes safer when his ability in blasting is enhanced through education.

The Explosives and Blasting Inspectors answered 100% of all public complaints concerning blasting vibration, noise, flyrock, and other related problems stemming from blasting. In addition, they continue to make routine inspections of all blasting operations to ensure compliance with the laws and regulations governing the use of explosives.

In addition to the mines, quarries, and construction companies engaged in using explosives, the division also routinely inspects those engaged in the manufacture, sale, storage, and transportation of explosives. Forty-two companies engaged in the distribution of explosives within the Commonwealth have registered with the division.

The division is also still operating under an agreement with the Department of Natural Resources Bureau of Surface Mining Reclamation and Enforcement to aid in implementing the explosive regulations of the Federal Surface Mining Act of 1977. Our cooperation with the Department of Natural Resources has permitted continuous and consistent inspection of surface coal mine blasting with a minimum of duplication.

In November of 1981, several changes were made in the regulation concerning blaster's licensing. These changes increased the annual renewal fee to ten dollars. Also, a time limit was established for those persons who fail to renew their license. If a blaster's license has expired for more than five years, it is void, and that person must reapply and be re-examined before he can legally detonate explosives again.

Another change reflected the increase in blasting for seismic exploration. This change made it easier for those people to perform their highly specialized type of blasting with a Limited Kentucky blaster's license or written waiver. Finally, provisions were made to accept reciprocal blaster's licenses from states having programs equivalent to Kentucky. At this time only Virginia and Alabama have such an arrangement with this division.

During the year the division also participated in a number of seminars co-sponsored by other agencies such as the Institute for Mining and Minerals Research, Kentucky Department of Transportation, Rural Electric Cooperatives, etc. It has been our intention to use every opportunity for educating the public and training the blasters in the safe use and potential hazards involved in blasting.
